

### ANSP-43SSW0

Polarizer, 33 – 53 GHz

#### Features

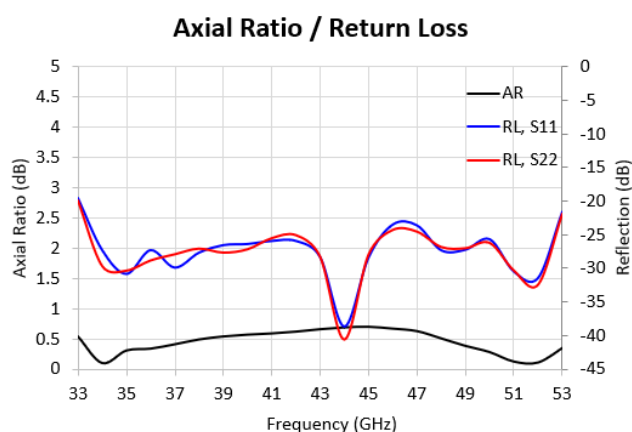

- Low Axial Ratio
- High Power / Space Application
- Broadband Coverage

#### Electrical Specification

|             |                                                                                                  |
|-------------|--------------------------------------------------------------------------------------------------|
| Frequency   | 33.0 – 53.0 GHz                                                                                  |
| Axial Ratio | 1.0 dB                                                                                           |
| Return Loss | 15 dB Minimum                                                                                    |
| Input Ports | 0.219" Square Waveguide                                                                          |
| Flange      | Square Port : UG-383/U, Round<br>Rectangular Port : WR-22, UG-383/U (UG-599/UM Flange Available) |
